

Application No.: 10/065,183

Docket No.: JCLA7802

IN THE ABSTRACT

Please amend the abstract as follows.

A touch control panel ~~that resists ultra-violet rays. The touch control panel includes~~ comprises a transparent substrate, ~~and a contact layer. A,~~ a first transparent electrode is formed over the transparent substrate. ~~A~~ and a second transparent electrode is formed over the contact layer facing the first transparent electrode. The space between the first transparent electrode and the second transparent electrode contains a plurality of spacers. The transparent substrate or the contact layer or both have ultra-violet ray shielding capability.
